ACUPUNCTURE TOGETHER CONSENT TO TREAT:

Acupuncture is the stimulation of certain points near the surface of the body by insertion of needles to prevent or modify the perception of pain, normalize physiological functions and treat certain diseases or dysfunctions of the body. While most people find their treatments relaxing and/or energizing, there may be minor side effects, such as slight pain or discomfort at the site of needle insertion, bruises, weakness, fainting, allergic reaction to the metal needles, infection (rarely) or aggravation of symptoms existing prior to treatment.

Herbal medicine means using plant, mineral and animal (rarely) materials to address issues of the respiratory, nervous, endocrine, reproductive and digestive systems, and side effects may include symptoms in any of these areas.

Please let us know if you are or become pregnant before or during your course of treatment. Acupuncture and herbs are safe during pregnancy as long as your acupuncturist knows and can avoid contraindicated points and herbs. No absolute guarantee can be made about the efficacy of any treatment.
